is an intelligent woman, and in all our meetings she has appeared mature and attentive. She has been prompt and reliable in her meetings. She discusses her problems calmly and accepts instruction and criticism without argument. She has responded well to instructions and has morked hard in trying to improve her reporting. She appears to be well adjusted to her environment which is most extremely trying at times.

In discussions concerning the Communist and leftist movements, she admitted that at one time she was influenced by their ideology, but as she had grown older and had observed more of their activities and personalities, she had lost all respect for them. She said that she had been fooled by Fidel Castro in his early days and had thought he would be good for Cuba, but as events have developed she has seen how mistaken she had been originally. She also commented that in long talks with LINLUCK, he had opened her eyes to the fallacy of the Communist ideology. In all of these conversations she has appeared sincere in her statements. Her liason with LIBLUCK appears to be based on deep affection for him and not on promiscuity. The case officer has the impression that if there was not a present Mrs. LINLUCK she would become legally his wife. This is a problem that may have to be faced in the future.

LICOOKY-2 doesn't present any personnel problem. Thile his niche is a small one and his access is limited, his assignments are carried out conscientiously.

5. Probleme

There are no unusual problems presented by this project.

THE LET MY MELT FROM CLANESON

LICODEY-2 admitted the access to her communist contacts here had been hurt as a result of her known association with LIMITCK. at the time be publicly broke with the party. As an example of this, Miguel Torella told her that Gutierrez had referred to LIBIECE and LICOOKY-1 as "enemies" of the party and that he had been reprinand The land town. Et had been TARCO AND NOTE ARREST SOCIETY STORY OF THE CONTROL OF THE CONTROL

WOR INTO A TELECORY-1 a target-studies and suggestions on possible recruitment approaches has been helpful. While her reporting for the will post month has not produced any Information Reports, it has kept the station aware of the activities in her particular area of access. If she is successful in performing her tasks as outlined in the perggraph under "Production" above, such information will be useful to the station. LICOOKI-2's effectiveness is limited to his narrow target, but such travel information that he does provide does serve a useful purpose.

It is planned to continue the present direction and guidance given to LICOMN-1 in an effort to increase the quantity and quality of her production.

The same attention will be given to LICOCKY-2.
